PROFESSIONAL SUMMARY

Front-end Engineer with 1+ year of experience building scalable, performance-optimized web applications using React.js, JavaScript (ES6+), and modern front-end tooling. I specialize in architecting reusable component systems, managing complex state with Redux Toolkit, and integrating RESTful APIs to deliver seamless user experiences. I write clean, maintainable code, follow engineering best practices, and focus on shipping high-quality features that are reliable, accessible, and easy to maintain

SKILLS

- React JS & State Management
- JavaScript (ES6+)
- REST API Integration
- Git, GitHub (Version Control)
- Redux Toolkit, Context API
- HTML5, CSS3, Tailwind CSS, Bootstrap
- Next.js (Foundational Knowledge & Active Adoption)
- Odoo (Custom Code & ERP Solutions)

TECH STACK

- Component Architecture
- State Management
- API Integration
- Responsive Design
- Performance Optimization
- Cross-browser Compatibility
- Reusable UI Systems

PROFESSIONAL EXPERIENCE

Frontend Developer

November 1, 2025 – March 15, 2026

TABSAP | Buner, KPK, Pakistan

- Engineered and maintained production-grade React.js applications with a strong focus on component reusability, modular architecture, and long-term maintainability.
- Implemented complex user flows using React Router, nested components, and optimized state management with Redux Toolkit.
- Integrated multiple RESTful APIs, handling authentication, dynamic data rendering, error handling, and UI state synchronization
- Built scalable UI components and shared libraries to standardize design systems and accelerate development across features.
- Optimized application performance through efficient rendering, memoization, and code-splitting techniques to improve load time and responsiveness.

FRONTEND DEVELOPER (REMOTE)

December 2025 – Present

Contract / Part-time (Collaborating with Senior Developer)

- Translate Figma designs into pixel-perfect, responsive React interfaces with strict attention to detail and cross-device compatibility
- Build modular, reusable, and accessible components following best practices and modern UI/UX standards.
- Implement advanced state management patterns using Redux Toolkit to handle complex application states and asynchronous workflows.
- Mobile-First Optimization: Focused on mobile-first responsiveness and cross-browser testing to deliver seamless rendering across all mobile, tablet, and desktop screens.
- Actively exploring Next.js for routing and basic data fetching to build modern React-based applications

● **Odheyati — E-Commerce Qurbani Platform**

React.js Express.js, Node.js MongoDB
<https://odheyati.com/>

Full-stack e-commerce platform built with Node.js, Express.js & React.js, enabling online ordering, payment processing, and delivery management

● **Enterprise Management System (EMS)**

React.js, Redux Toolkit, Tailwind CSS
ems.tabsap.com

Architected and developed a high-performance, responsive Enterprise Management System (EMS) dashboard designed to streamline corporate workflows and data monitoring

● **Product Operations Dashboard**

React.js, Redux Toolkit, Tailwind CSS

<https://product-dahboard.netlify.app/>

Scalable inventory management platform engineered with optimized state orchestration, real-time data workflows, and performance-focused UI architecture

● **Propertians — Real Estate Portal**

React.js Next.js, REST API
<https://propertians.com/ae/en>

Real estate marketplace with dynamic property listings and advanced search filters, built for UAE and Pakistan markets

● **UOMO — E-Commerce Store**

React.js, Tailwind CSS, CSS
<https://uomoecommerce.netlify.app/>

Modern e-commerce storefront with dynamic UI, smooth navigation, and optimized shopping experience.
